The article also stated that one of the ladies fell and was seriously injured. It was signed by — Pratt, M. D. We have no such M. D. among un, and it is probably a lorged name—the writer being ashamed to sign his own. The facts are these: About a thomand ladies, as indicated by their names to a petition, have resolved that the sale of intox eating drinks shall be suppressed in our place. A committee of about sixty meet from time to time, to confer and take measures for effecting this object. Since they began their work six of these places have closed up, and several others are in a fair way of doing so zoon. The ladies are determined not to slop until they see the thing entirely abolithed from our midst.

VOLUME XII.

PRESS AND TRIBUNE. MONDAY MORNING, JANUARY 10, 1859.

The Legislature.
The late snow storm and the intensely cold reather have blockaded the Springfield mail.

A variety of interesting political items from Kansas will be found in our telegraph column. The Legislature has adjourned to Lawrence with the suction of the Gowernor. Bills have been included for the repeal of all the bogus charters, and far the soldition of slavery. The movement to the annexation of Southern Nebrask to Kansas is progressing. Gov. Medary suggests in his mesage that kissing goes by favor, and the general government will be disposed to deal liberally with Kansas in proportion as she deals liberally with National Democracy.

Grand Pension Plunder Scheme arres that "if there was any propriety or jus-tice in the measure, its operation should cer-lainly not commonce with the present Congress, but should extend back to the time of service, and to the heirs of those who have since passed out of existence. As there were about half a

health was injured, though not to such an ex-

ce them sho die in battle or from any of the sections of war."

The National Treasury is in no condition to be bled ten to fifteen millions per year. It is quite resently that the government endowed all those who performed military day in the "last war," with the choicest portion of the public domain. Bonty Land Warrants have been granted octably for the benefit of the militia of 1812, and their widows and heirs to the enormous amount of cixty-two millions of acres! And now and their widows and heirs to the enormous amount of cixty-two millions of acres! And now we have the same lobby sharks clamoting at Congress for life pensions for this same class of people. The thing is an outrage, and we are confident that those whose interests are extended to the people of the Pension bill, will join with the public at large in denouncing the scheme as wrong in principle, inexpedient, uncelled for, and a gross imposition upon the body politic, it is aften subject, however, for demagoguis to east and onivel over for the purpose of manufacturing bunkum, but for the people at large, who must pay the indefinite millions per year, for an indefinite period, this plusdering plot

The Snow Storm --Condition of the waitrone-of the St. Louis Train sanswedle,."
The snow storm which occurred on Phursday night seems to have been greatly extended, and more sovere in other localities, especially seath of us, than in this city and ricinity. We gather the following facts in regard to the effect of the storm upon the different roads, entering here from the officers of the road.

MIGHIGAN CHATALL.—The New York Express train, due here yesterday morning at 4.30, did not

The trains will be regular hereafter.

ILLINOS CENTRAL —Bverything has been regular on this read.

BURLINSTON AND QUESUV.—The morning train on this road was two boars late, the delay occurring between this city and the Junction, the snow being pretty bedly drifted in some places. The road is now clear.

Onceaco, Alrow and Sr. Louis.—This road seems to have suffered more, interruption from the storm than any other. The difficulty is south of Shoomington. The train which was due here at 11:20 Priday night, had not arrived at ten o'clock last evening, it being badly snowed in at some locolity which we could not ascertain, South of Shoomington. The secommodation trains between here and Jolies have run on regular time, there being no more snow on that portion of the road shan in this city.

No interruptions whatever have taken place on the Chicage and Rock Lalend, Galena and Chicago Unice, St. Paul and Fond du Lac, cr Ohicago and Miswakes Roads, the stora on the hines of these roads being of about the same violence as in this city.

A Mass Mardors his Father-in-Law and Wife, and Attempts the Life of his Mother-tin-Law.

From the N. I. Evening Post chilat.

A bloody tragedy was enacted in the rear of 154 Sullivara street, about 50 clook this morning. A Spaniard mardered his father-in-law, attacked his wife, and inflicted a wound from which she cannot recover, and attempted the life of his mother-in-law.

It seems that the murderer, Felix Sanchez, married a colored woman named Mary Jans Curnan, and has since lived in the family of his father is law. Horman Curnan, at the premises mentioned above.

Sanches was formerly a porter in a dry goods store, and a man of irregular habits and jesious disposition, and did not live upon the most amicable terms with the other members of the household.

Last night he absented himself from home unit about half past two o'clook, when he returned, and entering Mr. Curnan's apariments, without any immediate provocation drew a search-cane and attacked him. Curnan was awakened by his sutrance and row from the bed, when Sanches stateked him and thrust the long, sharp blade through his body, piercing the heart. His victim feli to the floor and immediately expired.

The murderer next attacked Mrs. Curnan, his

His visitin fell to the floor and immediately expired.

The murderer next attacked Mrs. Curnan, his mother-in-law; but she had been fully aroused by the fall of her husband, and evaded the blow aimed as her heart so that the blade struck her arm and passed cottrely through it.

By this time the murderer's wife entered the apartment, and Suckees, turning upon her, run the blade completely through her body, inflicting a wound which, it is said, she can survive but a very short time. The murderer then effected his escape, and has net yet been captured by the police.

The sefficers of the 8th ward were notified this morning, and took possession of the premises. The dead body was removed to the station-house, and the wounded parties to the hospital.

Coroner Schrimer has the case in hand, and will take an ante-motiem examination of Mrs. Sanches. She declares that she knows no cause for the bloody deed.

THEO DAY—MORNING EMESTON.

The Court opened at 10 A. M., with a large crowd of speciators in attendance, the interest in the trial having manifestly increased since its onesity.

It was indicated at the outset by the defence that their main positions would be rested upon medical testimony as to the natural course-quences of the wound inflicted on Mr. Vial by the prisoner, and to show if possible, intervening causes from which death resulted, and the nature and unportance of this questise caused a large representation of the faculty in our city, exclusive of the numbers subponneed in the case.

The prisoner appeared but little if any changed from the time of his first arrest. He is a young firshman of about twenty-six years of age, of decidedly good looking appearance for his cless, and of sufficient intelligence to comprehend the perils of his case. He seemed to watch closely the lestimony, suggesting points from time to time to his changed from the time to the case we gave in full in our last issue, and from whose evidence that of Dr. Max Myers' varied in memorand of the case we gave in full is our last issue, and from whose evidence that of Dr. Max Myers' varied in memorands of the case we gave in full in our last issue, and from whose evidence that of Dr. Max Myers' varied in memorands of the case we gave in full is our last issue, and from whose evidence that of Dr. Max Myers' varied in memorands of the stand that wounds of this kind are dangerous on account of the danger of the joint water secaping. The escape of the joint-water is not anoceastly dangerous. A stiff joint would be more likely to ensue than death. According to his experience about 3 per cent of injuries of this kind were followed by amputations, and 8 per cent of injuries would be likely to recover. There were no serious con-

Mr. Houston of Ala. said the former Attorney General gave as opinion adverse to the claim, but Mr. Whittiesey declined to yield obedience to it, taking the ground that the law anthorised him as first compredient to adjust the damages. The present Compredient, Mr. Medill, was governed by a similar opinion of Judge like the compression of the fact that the law instructed him to the fact that the law instructed the first compredient to carry its wrill into effect, and contended that the Attorney General had no power to prevent the execution of the law.

Mr. Junes of Favinces understood that Congress did not decide whether damages were due or not, but constituted the first comproller a chancelor to set upon and determine the case on its merits.

Mr. Shields spoke in favor of a Northern route Pacific railroad to Paget's Sound, setting forth its advantages over all others.

Mr. Docilitie moved to amond in substance that a board of three Engineers be appointed to survey each route, the Northern, Central and Southern, and report the capabilities and an estimate of the expense of each for the next meeting of Congress. A new feature in the amendment is that alternate sections of land along the reute shall be opened under the Homestead law to actual settlers.

Mr. Trumbull, speaking nominally on the Pacific R R, question, replied to Iverson's speech of yesterday. He took notice of his (Iverson's) altasion to the Hilinois election, and denied the claim of modern Democracy to that honored title. He (Trumbull) considered them mere survivors of prostrate Whiggery. He went into a history of the rise and progress of the Republican party, and agreed with Iverson that they would go on progressing until they obtained power and administrate in secordance with the true principles of the Constitution.

He shought the reasons assigned for the refusal utterly indefensible. It was a high neurpation of power, which became the dignity of Congress to resent in the most efficient manner. It was important to know whether Bureau or Cabineti officers have the right to make laws for themselves. He wanted the Judiciary Committee to examine and report whether jurther lagislation was necessary.

In Jitt.—The doctor, whose name is Ang. Robert Learre, and who obtained some \$1,000 from the Leo Crosse County Bank, by a frastitulent drait, was recently arrested at St. Lénis and is now in jail in this city. It is rumored that an effort is being made to compromise the matter, and allow this swindler to roam again at large. GROUND FOR DIVOROR:—A woman made application at Cincinnati, a day or two since, for a divorce, on the ground that her husband was a confounded fool. The magistrate informed her that, if that were to be a valid reason in law, half the married women in the city would be legally entitled to a marrimonial separation. The woman seamed comforted with this assurance—wretchadness is always allwriated by numbers—and departed from the magistrate's court with an improved frame of mind, and with a touch of consolation.

CLERICAL SCRUNDEL.—The United Brethren Society at Marion, Linn County, have suspended Rev. Rev. Wm. D. Tilbury from the ministerial office for gross misconduct—such as theft of a \$5 from one of his parishioners—baying lumber and refusing to pay for it—selling two or three dollars worth of slockings and mittens, the manufactures of a poor widow woman, and defeateding her out of the money, Ac. Our faith in goodness strong. — Whitele The New Senate Hall. OUATER CITY, DOUBLE LOCK Hall, of which the Senate took possession on Wednesday last, will be read with interest:

The general aspect of the new Senate Hall is light and graceful. In shape and dimensions it is similar to the new Hall of Representatives, but to the eye appears more fuely proportioned. The style and character of the decorations are nearly the same is both Houses, except that in the Senate the tone of color is more subdued. The area of the floor is 80 feet by 48 feet, and of roof 112 by 80 feet, the difference being occupied by a continuous gallery around the four sides of the apartment, and capable of seating I,200 persons. The linear roof, or celling, of iron, is first, with deep panels, twenty-five of which are filled with ground glass, having in the centre of each pane a colored medallion representing the printing press, steam engine, coroncopia, and other symbols. The light is snappled wholly through the window in the roof. The gas-apparatus is placed above the ceiling. The celling is 35 feet from the floor, but presents an appearance of greater altitude. It is incrusted with floral and other embellishments in high relief, and all of iron. The floor of the chamber is covered with 1,700 yards of tapestry carpeting, having a large pattern of flowers on a purple ground. The Vice President's deak is a modest table of mahogany, as unlike as possible to the marble bar of the House of Representatives. The places of Senators are arranged in three rows.

The spectators' galleries are upholstered in drab damask. Ample accommodation is supplied, even to the extent of a ladies' robing-rom. Access to the galleries is obtained through doors of maple, iniald with bronze. The gallery set apart for the Press is fitted with desks for about twenty persons, and its understood that no one will be permitted within it unless appeintly accredited by the Vice President.

No. 122 Lake street self is approached by two grand statrways, the cast of Tennessee marble—the west entirely of white marble of extreme purity. Neitner is yet completed, but enough is above by the broad marble steps, the massive balustrades of the same material and the superbecolumns, with their capitals heightened with broaze, to indicate the magnificence of the design. Both stairways are lighted from the roof, with special adaptation to the walls, being covered with historical paintings. This situation is considered the most favorable in the building for the execution of some work of Awarded for the The following droll affair lately happened at Kinderhook, New York. A young tellow, an enemy to the libersies of America, going to a quisting frolic, where a number of young women were collected, and he the only man in company, began his aspersions on Congress as musl, and held forth some time on the subject, till the girls exasperated at his impudence, laid hold of him, stripped his maked to the waist and instead of tar eovered him with molasses, and for feathers took the downy tops of flags, which grow in the meadows, and coated him well, and then let him go. Me has proceeded every one of them, and the matter has been tried before Justice Schoosmaker. We have not as yet heard his worship's judgment. It is said Parson Buel's daughter is conserned in the affair. covered with historical paintings. This stuation is considered the most favorable in the
building for the execution of some work of
art recording the deeds of history.

The Senators' reiting-room and antechamber are the most highly faished rooms
in the Capitol. They are in totally different
styles. The reiting-room is entirely of marble,—the roof supp. tied by columns of rare
beauty. It is impossible to desire any effect
more chaste than this apartment presents,
with the cold glitter of its walls and roof,
"unadorned, aderned the most." Three mirrors, inserted as panels in the wall, are, each
of the dimensions of 120 inches in height by
60 inches wide. The ante-room is excessive
in ornamentation, and is yet unfaished. The
walls are divided by glided work in relieve,
into spaces for freece paintings. The dome
celling in the room is paneled, each panel
being filled with a resette oil burnlisted gold.
The four spandrils and the centre of the dome
have allegoriest paintings executed in a
superior manner, and forming a contrast to
certain medaltions in another portion of the

lowing is a free translation of one of these passports:

"ANGAL GARRIEL—Deer Sir. In consideration of the sum of Rs. —, paid by Shiek Abdul Karim into our common treasury, you will please deliver to him on arrival at your place, three pomegranate trees, two date do., one tamarind, and other trees in proportion. Also seventeen black houris and seven palanees, horses and cast e in abundance, and oblige yours, &c., ——."

Larms or Surmonans—It is a superstition of esilors that the presence of ladies on board ship brings ill luck, while the owners of vessels, on better grounds, perhaps, object to the captains taking their wives with them, lest the astentions due to the latter should distract their watehfulness for the interests of their employers. The Sandwich Island Friend, however, endeavors to prove by statistics the fallity of both these opinions. It says that there are now no less than forty two shipmasters in the whaling business in the Pacific, accompanied by their familles, and the average catch of nine of these ships, now in port at Honolini, is 750 bblas, while the average catch of the entire fleet is only 575 The Predicate and Vice-President's spartments, and the committee rooms, enter from the level of the Senate floor. All are decorated. Some flow are finished, but the greater number are incomplete, in connequence of the action of Congress in witholding supplies. The corridors and passages are likewise in progress of embellishments. All are laid with encausale tiles. The arched roofs are, generally speaking, finished in geometric designs, enclosing landscape and heraldic devices. The walls are covered with trelliswork of flowers and foliage in which Cupids and American birds, beause and ercepting things are ascending and descending, with more or less resemblence to nature. Some of the flowers and full pieces are gents. Commercial Printing, flowers and fruit pieces are gens.

The heating and vontilating arrangements are said to be the largest in the world—those of the Eaglish Home of Parliment not excepted. Every portion of the Capitol—the meuntanous mass of marble—is at once ventilated and warmed by one apparains. Eight boilers convey steam to colls set is different places the cellarage, supplying any degree of heat required, and at the same time motive power to two fars in either wing. One of these fams seeds continual brezus of medicated air through the smaller apartments, while the other performs the same service for the Sensit Chamber. The air is graduated, according to the atmospheric temprature without and the political excitement within—during a sectional debate never to exceed 90 deg, and no ordinary eccasions to range OYSTERS OYSTERS OYSTERS.

Charles Wesley's hymn,

"Jean, love of an son," had been sung on the previous Sabbath, free a volume where is had suffered from abbre viations and alteration; he again complained this injures habit, repeating the whole according to the original, and with the same earnest intonations. In this manner he in terested us desply for two or three hours, until the ringing of the bells gave warning to the hour ir ten had already passed when we arose hurriedly and entered the cabin. The Jennings Estate. The Jennings Estate.

We have been shown a chart of the pedigree of the descendants of John Jennings, of Birningham, England, whose immense estate is now held by the government of Great Britian swaiting the proof of heirabip on the part of those who may be entitled to alaim under him. It is a most elaborate paper, and gives the evidence of great research and care in its perparation. The limited inspection which we were enabled to give it, induces the conclusion that the parties claiming to be the New Jersey tranch of the family are the real heirs to the estate. The chart in question, which has been recently prepared in England, is about 27 feet in length by nearly 3 feet in width, and traces the genealogy of the parties

NEW EDITION width, and traces the genealogy of the parties interested to perfection.

The amount of money involved in the controversy which exists as to the heirship of the estate is finmense—running np by estimation to ten or twenty millions dollars.

John Jenners, or Jennings as it is now applied was an iron merchant of Bermingham, England. The date of his birth is not given to this his patient is set down as on October 6th 1579. He was married, as it appears, on the 24th day of October, 1602, to a count named Mary Jennens, and again in 1622 to John Wesmen. He died, or rather, was buried bath the 25th of February, 1653 and left a will, as we understood, which was preved in the same year. Mr. Jennens, as it appears, had varous children by his two wise but the proposition of "next kin" seems to have been brought down to Humphrey Jennens, randfather of "mext kin" seems to have been brought down to Humphrey Jennens, randfather of "mext kin" seems to have been ubmilted to us, there would seem to be but little difficulty in actiling the question of right, were it not for the intervention of "Earl Howe." who, although connected with the family in on illegitimate manner claims the control of the entire estate. For some years "Howe" had it in his possession, but by some action of the English Couris he was dispossessed, and the custody of it was 'placed in the Crown.
